## Freeride

### Product Specification

HodgePodge Playpoints are climbers or rockers or twisters. They are Playpoints first and foremost, but they are also very nice pieces of public design, and they are sculptural. All HodgePodge Playpoints are high-end engineered units made from high-quality materials like stainless steel with a brushed finish, powder coated recycled aluminium connectors, high density polyethylene (HDPE) panels and ITR-bearings for maximum safety and durability.

Get inspired! Freeride is both a seesaw and a lounge simultaneously and offers numerous options to exercise and chill out. Whether on your own or with others: your imagination knows no limits. A special rubber bearing system provides the needed balance!
