## Twist. 15

With its helical shape, the product "Twist" adapts to any landscape. Arches of different sizes can be combined at various angles. No matter whether the climbing structure is 5 or 500 m long, the net made of original Berliner U-Rope provides continuous climbing fun for young and old alike on a varied and challenging climbing course. Shout's steel frames run parallel. Whether they rejoin after
looping or protrude tongue-like into the landscape is left entirely to your own creativity.

The Twist. 15 wriggles like a snake through the landscape, its sheer size enabling many children to be accommodated simultaneously.

## Technical Data

Technical changes are reserved．The following text can also be used for tenders．

## Arch－Structure：

Steel pipes $\varnothing 133 \mathrm{~mm}\left(5^{11 / 4} 4^{\prime \prime}\right)$ ，wall thickness $5 \mathrm{~mm}\left(3 / 8^{\prime \prime}\right)$ ．Anti－corrosion treatment and colour finish：sandblasting，zinc sprayed and solvent－free epoxy－／polyester－ process．

## Balls：

Frameworx ${ }^{\circledR}$－aluminium ball connectors；$\varnothing 250 \mathrm{~mm}\left(9^{13} / \mathbf{h}^{\prime \prime}\right)$ with enhanced wall thickness of $45 \mathrm{~mm}\left(13 / 4^{\prime \prime}\right)$ ．Anti－corrosion treatment and colour finish：sandblasting and solvent－free epoxy－／polyester－process，securely closed with durable EPDM－caps．

## Ropes：

U－Rope ${ }^{\oplus}$－round strand ropes with galvanised and covered wires；external strands with non－abrasive UV－resistant Polyester－yarn（no Polypropylene），$\varnothing 18 \mathrm{~mm}$（ ${ }^{\left.11 / 16^{\prime \prime}\right) \text { ）．}}$ Rope crossing points are localised by durable，drop forged aluminium ballknots（no plastic）or with bolted T－Connector－clamps replaceable connected．

## Charlotte－Connector：

Internal fastening system for single rope endings at the arch tubes．The fixing works without hooks or visible ferrules．Pre－prepared net segments can easily get installed and still stay exchangeable．

## Climbing Rope：

Rope with a diameter of $\emptyset 18 \mathrm{~mm}\left({ }^{\left(11 / 16^{\prime \prime}\right)}\right.$ and climbing knots made of durable hard rubber cylinders．The distance between the cylinders is approx． $300 \mathrm{~mm}(11$ 13／16＂）． The climbing knots are fixed to the rope by aluminium press clamps．
