## Quadrifol. 03

## Product Specification

The Quadrifol is a net climber where the spatial net is suspended within a cupola. Bursts of energetic climbing, spinning, sliding, and dangling interspersed with areas perfect for hitting the pause button - the flubber pods give children an opportunity to rest and recharge. Climbing in spatial nets is challenging and stimulates 3D-thinking and the psychomotor skills of children. Users have the freedom to move in any direction they choose. Of course, the Chess Board Arc is an exciting challenge for those who want to jump and sway!

The Duck Jibe excites all types of surfers. The Banister allwos a quick way down. The simple, yet elegant, structure of the Quadrifol is easy to install and low-maintenance.

## Quadrifol. 03

### 71.133.003

| Product Family |  |

The dimensions of the equipment and protective surfacing area have been rounded up to one decimal digit.

## Technical Data

Technical changes are reserved.
The following text can also be used for tenders.

## Bent Tubes:

Bent steel post Ø $133 \mathrm{~mm}\left(5^{1 / 1 / 4}\right)$. Anti-corrosion treatment and color finish: sandblasting and solvent-free epoxy-/ polyester-process.

## Spheres:

Frameworx ${ }^{\ominus}$-aluminum ball connectors, $\varnothing 250 \mathrm{~mm}$ (9-13/16"). Anti-corrosion treatment and color finish: sandblasting and solvent-free epoxy-/ polyester-process. The tensioning ball incorporates an AstemTT ${ }^{\oplus}$ net tensioning system. Securely closed with durable EPDM-caps.

## Terranos ${ }^{\bullet}$-Clamps:

Two-part cast aluminum connecting clamps for the height-adjustable connection of rope elements or steel pipes to Terranos® steel posts. Anti-corrosion treatment and color finish: sandblasting and solvent-free epoxy-/ polyester-process.

## Curved Banister:

Frameworx ${ }^{\oplus}$ - curved stainless steel pipes $\varnothing 60,3 \mathrm{~mm}\left(23 / 8^{\prime \prime}\right)$. Connected to the main structure with 2 Frameworx ${ }^{\text {® }}$ - aluminum ball connectors $\emptyset 200 \mathrm{~mm}$ (79/10") with embedded fastening system.

## Rubber Membrane:

Rubber membrane comprised of durable, vandal-resistant conveyor belt material. Thickness approx. 9 mm (3/8").

## Duck Jibe:

Curved Frameworx ${ }^{\oplus}$ - stainless steel pipes $\varnothing 42,4 \mathrm{~mm}$ ( 1 1/4"). Lubricated, antifriction reciprocal bearings, connected to the main framework with a thick-walled Frameworx ${ }^{\oplus}$-aluminum ball connector, $\varnothing 250 \mathrm{~mm}\left(9-13 / 16^{\prime \prime}\right)$. The standing platform is comprised of grained HDPE, 19 mm thick. The turning bearing construction located in the ground consists of Frameworx ${ }^{\oplus}$ stainless steel pipe retainers.

## Net Arc:

Rope $\emptyset 16 \mathrm{~mm}$ (5/8"): mesh size minimum $250 \times 250 \mathrm{~mm}$ ( 9 4/5"). Rope crossing points localized by durable, drop forged aluminum ballknots (no plastic). Net attachment to the tubes with Charlotte-Connector.

## Charlotte Connector:

Internal fastening system for single rope endings at the arch tubes. The fixing works without hooks or visible ferrules, pre-prepared net segments can easily get fixed permanent but replaceable inside the tubes.

## Climbing Ropes:

Rope $\varnothing 18 \mathrm{~mm}\left(13 / 16^{\prime \prime}\right)$ with durable ebonite cylinders. Distance between cylinders approx. $300 \mathrm{~mm}\left(1113 / 16^{\prime \prime}\right)$. The ebonite cylinders are fixed to the rope with aluminum ferrules.

## Rocking Plates:

HDPE-disks $\varnothing 200 \mathrm{~m}$, milled from $19 \mathrm{~mm}\left(3 / 4^{\prime \prime}\right)$ HDPE panels. The edges are rounded.
