

# Climbing on a high Level

Unique Play Equipment for every Mountain

  
**Berliner**  
Play equipment for life

# Berliner Play equipment for life

This slogan means a lot to us! It defines how we work and construct playgrounds. In over 50 years that we have been dealing with playground equipment, we have built up an extensive product range with creative ideas and industry expertise at our headquarters in Berlin. Thanks to the sturdy construction, the extraordinary durability is standard for us. That is why we provide a guarantee for our products for a period of up to 15 years.

## Climbing on a high Level Unique Play Equipment for every Mountain

Whether at breath-taking heights, in magically themed worlds, idyllic campsites or stylish hotels – we turn every visit into an adventurous climbing experience. We can provide interesting and distinctive designs for any indoor or outdoor play area. Our play equipment is safe, sustainable and durable. This protects children and saves our environmental resources. Our play structures are also ideally suited for mountain areas. They blend perfectly into the landscape and enrich the surroundings with environmentally friendly, weather-resistant and versatile opportunities for play and exercise.

The first steps towards Berliner were made in 1865, when a factory producing ropes for the Berlin elevator industry was founded. The quality of the Berliner ropes gained a worldwide reputation. In the early 70s, we created the first spatial net climbing structure and began the world's first production of rope play equipment. However, the rope play equipment division initially remained very small and played a minor role as a side-line business. But even then, Karl Köhler who joined the company as a plant engineer in the late 70s worked with great enthusiasm on the further development and production of playground equipment. When the Bavarian parent company moved out of West Berlin and intended to give up its production facilities in 1995, Karl Köhler, then already Managing Director of Berliner Seilfabrik, seized the opportunity and took over the traditional rope factory in a management buyout. Since then, Berliner has been developing and producing exclusively playground equipment and has made a name for itself worldwide.

Today, Berliner is an international play equipment manufacturer and a full-line provider with around 150 employees, a subsidiary in the USA, and a strong partner network across the globe. Children can climb and play on Berliner structures in already 56 countries. Our family-owned company, based in the north of Berlin, is being run by David Köhler, the second generation of the Köhler family, with the utmost dedication and commitment. We are proud to be one of the world's leading and recognized manufacturers of playground equipment, producing high-quality, unique, modern, and versatile play structures with high play value in Berlin, while continuing to grow through constant development and innovation of our products.

As a full-service provider for playgrounds, we accompany you throughout the entire project and across all development stages of your individual playground: from the initial planning to the maintenance of the completed structure. Due to our in-house production and the wide range of our play equipment, along with the extensive services, we offer you top quality and maximum flexibility in the implementation of your wishes.

### Our Headquarters and Production based in Berlin

- Plant 1 – Rope Production, Rope Assembly  
Lengeder Straße 2/4, 13407 Berlin
- Plant 2 – Powder Coating, Packaging  
Flottenstraße 14, 13407 Berlin
- Plant 3 – Steel Construction, Mechanical Engineering  
Roedernallee 8, 13407 Berlin

The Berliner Creative Center with planning, design and development, the administrative departments, such as purchasing, controlling and human resources, as well as sales, marketing, quality management and the management are also located in plants 1 and 3.

# Over 50 Years of Experience in Playground Equipment

Lifelong spare part guarantee

## Materials

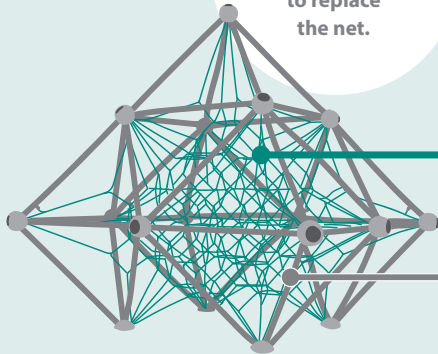

Everything is produced at our location in Berlin. High-quality materials and first-class processing make our playground equipment robust and long-lasting. Our rope comes from our own rope production facility using specialised machines.

## Technology & Design

The ropes are manufactured from materials that can withstand extreme weather conditions and high playing frequency. Because of its elaborate shape, the Cloverleaf Ring connects ropes at their crossing points, without sharp edges or entrapments. For maintenance, it makes the replacement of individual rope strands a simple task.

Even after over 50 years, it is still possible to replace the net.

2023

1970

Green Roof stores water, filters dust and noise and compensates for temperature differences.

No use of PVC in our production

## Product Portfolio

Our broad product portfolio consists of 13 product groups and includes, in addition to versatile rope play equipment, functional play points, imaginative play and learning walls and classic platforms with innovative add-on elements. Thanks to their modular system, our play equipment can be combined in an infinite number of ways. For every initial situation or dimension we have a suitable solution.

Solvent-free powder coating production

~~SOLVENT~~

Bamboo is a grass and grows back quickly after harvesting. That is why we use bamboo panels in our Greenville line.

Certification according to ISO 14001

## Inclusive Play

Our broad product portfolio offers children of different abilities a wide range of play and ensures the creation of versatile inclusive playgrounds. As a play equipment manufacturer, we have set ourselves the goal of developing as many varied solutions as possible for inclusive play spaces, thereby enabling all children – with and without impairments – to play together in a variety of ways.

Our aluminium is made of 85 % recycled material.

Our Woodville line made of steel and wood lasts longer than traditional wooden playground equipment, because the vulnerable parts are protected by constructive solutions from environmental influences.

## Berliner Creative Center

Our Berliner Creative Center fulfils every architectural wish. Architects, designers, landscape planners and engineers design customised and one-of-a-kind play sculptures, create new shapes and implement customers' wishes. Even our standard products can be customised according to individual wishes and adapted to the geographical environment. Let your imagination run wild!

# Play Equipment for any Landscape

Thanks to individual planning and our technical solutions, any area can be transformed into a climbing landscape. Whether on a flat surface or on a slope – there is always room for climbing and dangling.

With its numerous connections, the **Terranos Clamp** makes it possible to combine various climbing elements and play equipment at different heights. In this way, our play equipment can be integrated into the existing environment.

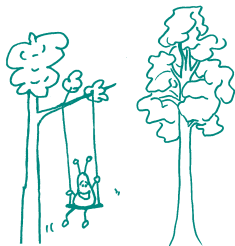

Continuously height-adjustable

Modular combination of various climbing elements and play equipment from different product groups

Flexible attachment of ropes, tubes and chains in a wide range of angles

Burch Creek Park in Ogden, USA

Thanks to the modular system, differences in height can be bridged and integrated into the playscape.

# Aventura in Medebach, Germany

Europe's longest climbing facility begins at the foot of the Bromberg in Medebach, Germany. Over a length of 168 metres, a wide variety of tunnels and bridges, balancing elements and rubber mats wind their way up the mountain through various towers. The Terranos Clamp with its flexible connections makes the diverse connections of different rope elements to the Terranos posts possible.

Individual integration of the play equipment into the existing environment

# Individual Design

You are looking for a special design or have your own themed world? With various customisation options and our wide range of colours for ropes, posts, balls and clamps, your wish is our command! We offer numerous solutions to ensure that your playground equipment fits perfectly into the surroundings and enhances the appearance of the landscape.

**Colours**  
Broad range of colours for ropes, posts, balls and clamps

**Design**  
Individually themed world thanks to highly precise milling machines

**Materials**  
Natural character and warm look due to wood

Combining the natural character, the warm feel and the pleasant scent of wood with the durability, stability and resistance of metal in our Woodville product group

Thanks to our own highly precise CNC machines, any design is possible.

Jungle Playground in Monheim, Germany

# Nygårdsparken in Bergen, Norway

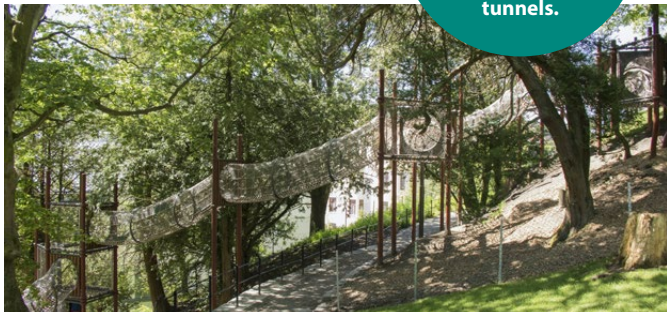

Warm and natural design due to bamboo panels in our Greenville product group

A well-balanced, natural colour concept allows the structure to blend in wonderfully with the prevailing tree population. The bamboo panels support this style as well. A total of 13 different climbing towers are connected via net tunnels and wind their way up a densely vegetated slope for more than 60 metres.

Various passages made of nets and HDPE panels provide variety in the tunnels.

# Versatile Range of physical Activity

Our wide range of products fulfils every planning request – at the same time the play structures harmonise perfectly with each other and create a thrilling adventure for children of all ages. Play equipment with spatial nets is ideal climbing equipment for kids and has been our expertise for over 50 years. Climbing in a three-dimensional space challenges and encourages children to develop their psychomotoric skills along with their three-dimensional imagination.

**Product Range**  
Diverse product range of the perfectly compatible play equipment – whether as a CombiNation or as separately assembled structures

**Spatial Nets**  
Three-dimensional nets with high play volume and room to move for many children at the same time

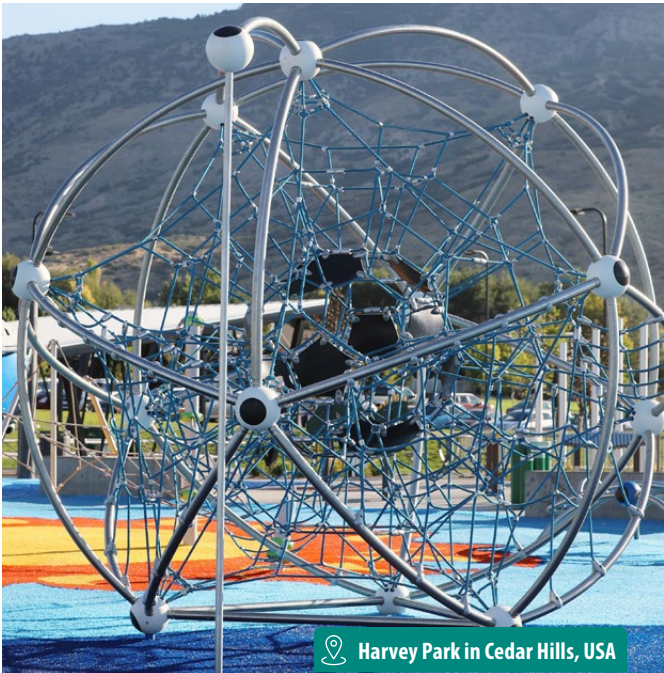

**Transparency**  
Perfect adaptation to the landscape and easy supervision of the children, thanks to maximum transparency of our rope play equipment

An even tension of the spatial net and simple re-tensioning thanks to the AstemTT® tensioning system

Oquirrh Park in Salt Lake City, USA

Harvey Park in Cedar Hills, USA

# Add-on Components

Numerous additional elements are suitable for all our product lines and offer many possibilities for making playground equipment exciting and inclusive for children of different ages and abilities. Here you will find a selection of our add-on components. Discover the wide range of additional elements and make your playground unique!

Access & Exit						
	Ladder	Rope Ladder	Ramp	Stairway	Access Net	Climbing Rope
On Top						
	Leaves	Flag	Fort	Dormer	Crow's Nest with Flag	Greenville House
Relaxing						
	Chessboard Cube	Triangular Net	Rubber Mats	Hammock	Rubber Nest	Net Sack
Balancing & Dangling						
	Slackline	Twisted Net	Air Walk	Harp Net	Triangular Slackline	Satellights

# Sliding Elements

With our different sliding elements, you can easily master great heights and different levels. Whether alone or with friends and family – the classic stainless steel slide, the Fast Lane Slide made of HDPE, thematically adapted to your wishes, or the White Water design element ensure even more fun on the slope and are just examples of the endless possibilities.

Descent			
	Fast Lane Slide	Embankment Slide	White Water
